SUMMARY

Motivated **MCA** student with a B.Com (Hons.) background and strong analytical, communication, and problem-solving skills. Experienced in developing academic web applications and understanding user requirements. Seeking a Product Manager or Software Developer role where I can bridge business needs and technology to deliver user-focused solutions while growing in product strategy and management.

ACADEMIC PROJECTS

Event Management System

Laravel, PHP, MySQL, HTML, CSS, JavaScript

Developed a web-based Event Management System with separate User, Vendor, and Admin modules.

- Gathered and analyzed user requirements before development.
- Designed the application workflow and database schema.
- Developed secure authentication and authorization.
- Implemented CRUD operations for events, bookings, vendors, and users.
- Integrated the MySQL database with the Laravel backend.
- Designed a responsive UI using HTML, CSS, and JavaScript.

Self Expense Tracker

PHP, HTML, CSS, JavaScript

Built a personal expense tracking web application to record, organize, and manage day-to-day expenses.

- Designed the front-end interface using HTML, CSS, and JavaScript.
- Implemented core logic in PHP for adding, updating, and managing expense records.

DATA ANALYST SKILLS & PROJECT USE

Data cleaning (Excel/Python): handle missing values, duplicates and inconsistent data.

SQL: JOIN, filter and aggregate records from relational tables.

Excel (PivotTables/lookups): summarize sales or expenses and calculate KPIs.

Power BI + Python (Pandas): build dashboards; explore trends and outliers.

EDUCATION
